**5%** **15%**

**Estimate Cooling Project Savings**  **to**

**Estimate Heating Project Savings**  **to**

Lowest should be the lowest value in the column for the monthly fuel cost  
 Cooling should be the total of the monthly values for cooling months minus the lowest value times the number of cooling months  
 Heating should be the total of the monthly values for heating months minus the lowest value times the number of heating months.  
 Project Savings should be the heating or cooling total time the percentage above the box.  
 Total Utility cost is the sum of all monthly costs of all fuels.
